

XMVector2AngleBetweenNormalsEst

XMVector3AngleBetweenNormalsEst

XMVector4AngleBetweenNormalsEst

XMVectorACosEst

```
graph LR; A[XMVector2AngleBetweenNormalsEst] --> D[XMVectorACosEst]; B[XMVector3AngleBetweenNormalsEst] --> D; C[XMVector4AngleBetweenNormalsEst] --> D;
```

The diagram illustrates a relationship between four mathematical functions. On the left, three white rectangular boxes are stacked vertically, each containing a function name: XMVector2AngleBetweenNormalsEst, XMVector3AngleBetweenNormalsEst, and XMVector4AngleBetweenNormalsEst. On the right, a single gray rectangular box contains the function name XMVectorACosEst. Three blue arrows originate from the right side of the three white boxes and point towards the left side of the gray box, indicating that the three functions on the left are related to or perhaps deprecated in favor of the function on the right.
