

XMMatrixTransformation

XMMatrixTransformation2D

XMMatrixTranslationFromVector

```
graph LR; A[XMMatrixTransformation] --> C[XMMatrixTranslationFromVector]; B[XMMatrixTransformation2D] --> C;
```

The diagram illustrates a relationship where two classes, XMMatrixTransformation and XMMatrixTransformation2D, both point to a third class, XMMatrixTranslationFromVector. The arrows indicate that XMMatrixTranslationFromVector is a common target or a base/parent class for both XMMatrixTransformation and XMMatrixTransformation2D.
